PROJECTS

Excel Analytics Platform

July 2025

An intuitive, full-stack MERN-based application to upload, analyze, and visualize Excel files. The platform empowers users to extract insights from spreadsheets using rich charts, history tracking, and optional AI-powered analysis.

SpeakVerse— A Full-Stack Blogging Platform

Mar 2025

SpeakVerse is a modern, feature-rich full-stack blogging platform built using the MERN stack. It empowers users to create, manage, and engage with blogs in a seamless, responsive UI, while offering powerful admin capabilities for moderation and platform oversight. With real-time interactions, rich-text editing, role-based access control, and cloud integrations, SpeakVerse delivers a complete blogging experience.

Real-Time Collaborative Editor

Dec 2024

Real-Time Collaborative Editor is a modern, feature-rich collaborative text editing platform built using React, TypeScript, TailwindCSS, and Socket.io. It enables multiple users to work on the same document simultaneously with rich-text formatting, live cursor tracking, and typing indicators. With unique username-based sessions, real-time synchronization, and seamless UI styling, the editor delivers an intuitive and interactive collaboration experience.
